

LED

PRICE DISPLAYS

Quality LEDs

LED displays contain no moving parts, only electronics with low power consumption.

Inno-Sign have developed a new generation of electronic Price Displays designed to meet current customer demand for up-to-date dynamic price signage.

Smart Price Lite

Smart Price Lite is based on SMD technology and provides high value cost performance ratio with no compromise on the quality.

A popular feature is an IR-remote control unit used for a low cost solution operated from the base of the price pole. The system can also be controlled remotely by a normal Handset, modem or PC.

Benefits

- Extended durability up to 100.000 hours.
- Very low maintenance.
- 60° and 120° viewing angle
- Ultra slim and low weight metal cases
- Plug-and-play installation
- Stepless dimming increases LED life
- IP54 housing protects against water, dust, insects and condensation from inside the Pylon.
- Many standard sizes and colours

Standard colours and sizes

Red
Red-orange (Amber)
Yellow
Green
White

Sizes in mm:
80 up to 500
