

ROLLER BLIND

PRICE DISPLAYS

Danish Quality

Inno-Sign manufacture Danish quality fuel price displays for Petrol stations.

Development of our product has resulted in Roller Blind Price Signs whose reliability has set an industry standard.

Reliability

Substantial numbers of Inno-Sign Roller Blinds displays are in daily use in many of the toughest environments in petrol stations, buses and trains.

The roller blind systems were designed originally for destination displays on buses and trains. This environment with its high levels of vibration, dust and high speed exposure to all types of weather provided the background for the development and manufacture of tough and reliable price sign displays.

Benefits

- One of the most reliable systems on the market.
- Quick and simultaneously pricechange.
- Easy installation with RJ-45 connectors.
- Dual sensor system - no bar codes.
- IP54 housing protects against water, dust, insects and condensation from inside the pylon.
- Unique spring tensioning system ensures that the film is under optimal tension.
- Almost any designs, sizes and colours can be made to match corporate scheme.
